- 1 시작 버튼 클릭
- 2 cmd 검색
- 3 명령 프롬프트 클릭

```
C:\Users#\...> WMIC BIOS GET SERIALNUMBER  
SerialNumber  
4CE9522HHN
```

The image shows a terminal window with a black background and white text. The command 'WMIC BIOS GET SERIALNUMBER' is entered and executed, resulting in the output 'SerialNumber' and '4CE9522HHN'. A red box highlights the command line, and another red box highlights the output line. Red circles with the numbers '1' and '2' are placed next to the command and output respectively.
