- 1 리모컨에서 메뉴
- 2 네트워크
- 3 서버 네트워크 설정

The screenshot shows the MagicInfo Remote Control interface. At the top, it displays 'Remote Control' and 'Device Name : office-info'. Below this, there's a 'Schedule Name : [NEW Schedule] 2022-09-22 14:02:57' and a 'Disconnect' button. The main area shows a 'Rotation 0°' dropdown and a large screen displaying the '서버 네트워크 설정' (Server Network Settings) menu. The '서버에 연결' (Connect to Server) option is highlighted with a red box. The menu also includes 'MagicInfo 모드' (MagicInfo Mode) with 'Premium' selected, '서버에 접근' (Access Server) set to '허용' (Allow), 'FTP 모드' (FTP Mode) set to '능동' (Active), and '프록시 서버' (Proxy Server) set to '끄기' (Off). A 'SAMSUNG' logo is visible at the bottom of the screen. To the right of the screen is a virtual remote control with various buttons like 'POWER OFF', 'QZ 1', 'ABC 2', 'DEF 3', etc. Below the screen are 'Start Mouse Control' and 'Send Text' buttons. At the bottom of the interface, it shows 'Device Model Name : QM75R', 'Device ID : bc-7e-8b-53-c1-be', 'IP Address : 192.168.2.10', 'FPS : 1 Second', and 'Image size : High definition'. Copyright information for Samsung Electronics Co., Ltd. is at the very bottom.

1 서버에 연결

- 1 매직인포 PC의 IP주소 입력
- 2 저장

감사드립니다.
